PROFILE

I am a skilled and experienced web developer with over 5 years of expertise, primarily in front-end development, complemented by some backend knowledge. My strong creative and analytical skills enable me to design and deliver user-friendly, visually compelling web interfaces that meet both user needs and business goals.

SKILLS

Technical skills:

- Front-end Development
 - HTML5, CSS, SCSS, JavaScript (JS), TypeScript (TS)
 - ReactJS, NextJS
- Back-end Basic Knowledge
 - NodeJS, Java, ExpressJS, NestJS, Spring Boot
 - MySQL, PostgreSQL
- Tools & Platforms
 - Git, SVN, Jira, Redmine
 - Proficient in Microsoft Office

Soft skills:

- Effective Time Management
- Adaptability and Quick Response
- Problem-Solving and Critical Thinking
- Leadership and Team Management

WORK EXPERIENCE

Hitachi Digital Services Vietnam
Team lead & Developer

JAN 2020 - PRESENT

- Responsible for analyzing, implementing, and optimizing both front-end and back-end solutions.
- Collaborated with cross-functional teams to deliver high-quality web solutions.
- Additionally, took on the role of leading team members to ensure the delivery of high-quality web applications within deadlines.

Key Projects:

1. Building Management System

- Role: Fullstack Developer & Team Lead

- Responsibilities:
 - Analyzed project requirements, created detailed plans, assigned tasks to a team 4 - 8 members.
 - Review the team's output (Source code, UT)
 - Implemented new features and screens based on customer requirements.
 - Maintained and optimized the performance of deployed screens to ensure smooth functionality.
 - Created and executed manual unit tests.
 - Prepared release documentation and built Docker images for delivery to customers.
- Technologies Used:
 - ReactJS, NextJS, SCSS, Node.js, ExpressJS, Jest, Docker, TypeScript
- Work Process: Waterfall

2. AI-Powered Decision Support System

- Role: Fullstack Developer & Team Lead
- Responsibilities:
 - Analyzed project requirements, created detailed plans, assigned tasks to a team 3 members.
 - Provided solution directions for the team based on received requirements.
 - Built the skeleton source code for the project to ensure a strong foundation.
 - Developed both front-end and back-end components based on detailed requirements.
 - Reviewed the outputs from the front-end and back-end teams to ensure quality and consistency.
 - Presented project progress and deliverables to clients after each sprint.
- Technologies Used:
 - ReactJS, shadcn/ui, socket.io, NestJS, Jest, PostgreSQL
- Work Process: Scrum/Agile

3. Document management system

- Role: Fullstack Developer & Team Lead
- Responsibilities:
 - Reviewed output documents from team members.
 - Created document templates for Bug Analysis and Detailed Design.
 - Studied and analyzed system documentation.
 - Developed detailed designs based on existing source code.
 - Supported the resolution of bugs reported by clients.
- Technologies Used:
 - Java, Springboot, JSP
- Work Process: Scrum/Kanban

4. Education System

- Role: Fullstack Developer & Team Lead
- Responsibilities:
 - Created detailed plans, assigned tasks to a team 4 members.
 - Implement UI upgrades based on client design.
 - Review team output.
 - Prepared release documentation and source code for delivery to customers.

- Technologies Used:
 - Java, JSP, JS, CSS
- Work Process: Scrum/Agile

Rikkeisoft Da Nang

NOV 2019 - DEC 2019

Fresher

- Build and deploy a weather notification website, providing the latest weather information to users.
- Technologies Used:
 - Java, Spring Boot, Spring Data, Thymeleaf, Bootstrap

Song Ba Joint Stock Company

JUN 2017 - SEP 2019

Technical staff

- Calculated and implemented Construction Drawings.
- Developed Tools using VBA.
- Technologies Used:
 - AutoCad, VBA
